Wall Preparation

The recommended height for a console cabinet with sink is 33-1/2". This requires installing a 14" wide wood panel to a height of 34-1/4". If an alternate height desired, adjust the rough-in and backing material heights using the dimensions provided.

STEP 1.

Marking for the cabinet

Having decided on the location of the cabinet, we mark and drill holes in the wall measuring the distance A, B, C

STEP 2.

Install the cabinet on the drilled holes

STEP 3.

Install sink top with Silicone

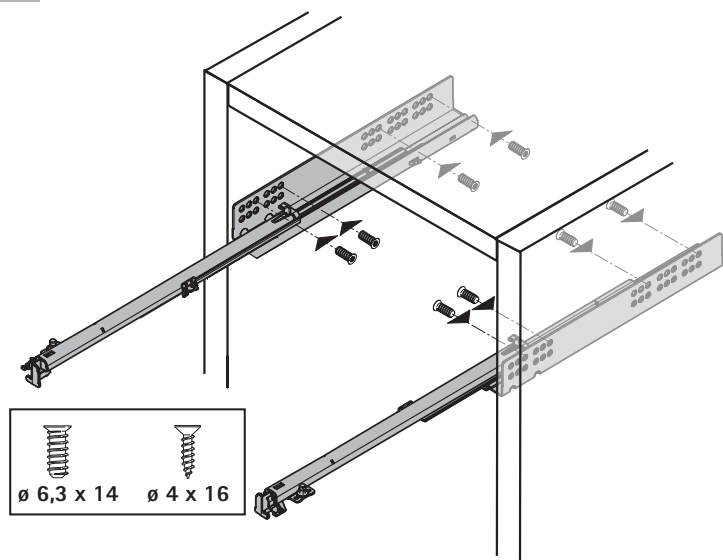

STEP 4.

Fill the side against the wall with Silicone and finish
